Attention: Admissions Committee for the Master's Program on Climate Change
and Marine Science (MRP-CCMS) of WASCAL.

Subject: Application for the Master Programme in Climate Change and Marine Sciences
(MRP-CCMS) of WASCAL.

Dear Madam, Sir,

It is with great enthusiasm that I submit my application for the Master Program in Climate Change and Marine Sciences (MRP-CCMS) of WASCAL. Strongly motivated by current environmental challenges and passionate about marine science, I am convinced that this program will provide me with the perfect opportunity to deepen my knowledge and develop crucial skills to effectively contribute to the research and management of the impacts of climate change on marine ecosystems.

In the process of obtaining a Master's degree in Ecology and Ecosystem Management, I have acquired a solid foundation in the fields of environmental engineering, restoration of ecological environments, as well as innovation and green growth. I had the opportunity to immerse myself in various research projects that reinforced my interest in environmental and marine sciences. My thesis, entitled Contribution to the Knowledge of Pollution Biomarkers, allowed me to develop analytical and in-depth research skills.

My professional experience, particularly as a volunteer with the MBolo association, has exposed me to the concrete challenges faced by rural populations in the field of fisheries resource management and climate change.

WASCAL's MRP-CCMS program represents for me a unique opportunity to benefit from cutting-edge training, provided by international experts, and to access a rich and diverse network of professionals and researchers. I am particularly interested in the modules covering adaptation strategies for coastal communities, blue economy concepts, the role of international organizations in climate management and the interdisciplinary approach of the program which I believe is essential to address the complexity of current environmental issues.

I am confident that my strong academic background, passion for environmental preservation, and desire to actively contribute to climate change and marine science research make me an ideal candidate for this program. I am ready to fully invest myself and make my contribution within the WASCAL community.

I thank you in advance for the attention you will give to my application. I am at your disposal for any further information or for an interview.

While waiting for your reply, please accept, Madam, Sir, the expression of my distinguished greetings.

Arona Diallo
